

I believe that the 3 major assignments truly pushed me within ENC 1101 to put forward quality work. The 3 essays allowed me to express myself and my ideas regarding course content by allowing me to argue a thesis using sources from coursework. They also allowed me to reflect on my path which led to me taking this class as I wrote about my literacy journey in assignment 1. This assignment also allowed me to gain a more complete understanding of multimodality through feedback as I fully integrated the included photos into the text. This further prepared me for subsequent assignments as we were required to include and analyze visual media in both the genre analysis and visual rhetorical analysis. The essays also pushed me to think more on our culture and ideas by bringing into discussion topics such as influence in advertising, art, and media. Through these essays, I believe that I have greatly improved my ability to interpret texts and incorporate multimodal elements into my work in the future.
